1710 NAVAL AIR SQUADRON SCIENTIFIC SUPPORT TO THE FLEET AIR ARM

MR JEFF DAY

DR CHARLOTTE POPE

LT DAN SMYTH RN

MATERIALS & MONITORING DEPT, 1710 NAS, ROYAL NAVY

CEMAST - DAEDALUS AIRFIELD / TUESDAY 11TH DECEMBER

Showcasing the work of the 1710 NAS Materials & Monitoring department which, has been providing scientific support since the 1940s. Their services include failure investigation of components when things go wrong, through to continuous data and oil monitoring to catch problems before they arise, as well as providing a wide array of technical advice to keep front line units operating their aircraft safely and at maximum availability. The lecture will explain the huge breadth of engineering activities that are going on behind the scenes, often unseen and uncelebrated, but critical to successful operations.

VENUE

CEMAST
1 Meteor Way
Broom Way
Lee-on-the-Solent
